REGIONAL CENTER PURCHASE OF SERVICES (POS) DATA LIMITATIONS OF POS EXPENDITURE DATA

1. Purchase of Service Costs

The Purchase of Service (POS) data displayed represents the cost of Services that Individual served received that are paid for by the regional center. This POS expenditure data does not include the cost of Services Individual served receive that are paid for by Supplemental Security Income, Medi-Cal, the school system, and other generic agencies. The POS expenditure data represents expenditures the regional center made for services Individual served received during Fiscal Year (FY) 2017-18 based on regional center POS state claim data that was provided to DDS as of December 16, 2018. The regional center may still make payments for Services provided to Individual served during FY 2017-18 up until June 2020.

2. Individual served Count

The total number of individual served who received services during the fiscal year will be greater than the regional center's actual caseload. A Individual served is included in the data if the Individual served received a regional center funded service at any time during the fiscal year. A Individual served who received a single service once during the year is counted the same as a Individual served who received ongoing monthly services. The Individual served is also counted regardless of their current status with the regional center. The data may include Individual served whose current status is closed, transferred-out, in-active, etc. if the Individual served received regional center Services during FY 2017-18

3. Contract Purchase of Service Expenditures

Due to the limitations of the regional center uniform fiscal system (UFS), POS expenditure data may not include payments made by the regional center that are paid to a Service provider under a "contract". Currently, UFS is unable to allocate expenditures paid to a Service provider under a "contract" to Individual served utilizing the "contract" Service.

Therefore, POS expenditures paid under a "contract" are excluded from the POS data. Typical Services paid to a Service provider under a "contract" may include, but are not limited to, transportation Services and supported employment program (SEP) group Services. Therefore, the total amount of POS expenditures reported will not reconcile with the regional center's actual POS expenditures for FY 2017-18.

4. Authorized Services

Services that are authorized "encumber" the funds needed to pay for those Services. The regional center's computer system (UFS) gives the regional center options regarding the "maintenance" of its encumbrances. When encumbrances are routinely adjusted for non-utilization, there will be a higher utilization percentage. When

encumbrances are routinely adjusted for non-utilization, there will be a higher utilization percentage. When encumbrances are not routinely adjusted for non-utilizations, there will be a lower utilization rate.

5. Individual served with Multiple Diagnoses

There are many individual served who have more than one diagnosis. In the summary reports for Purchase of Service Expenditures by Diagnosis and Consumers with No Purchase of Service by Diagnosis these consumers will be counted in every category for which they have a diagnosis. As an example, a individual served with a diagnosis of both autism and epilepsy will be counted in both the "Autism" and "Epilepsy" categories. Therefore, the sum of the individual served reported in all the categories will be more than the total number of individual served by the regional center.

6. Category 5 Individual served

Individual served listed in Category 5, according to Welfare and Institutions Code section 4512, are individuals who have "disabling conditions found to be closely related to intellectual disability or to require treatment similar to that required for individuals with intellectual disability , but shall not include other handicapping conditions that are solely physical in nature."
