

Community Resource Development Plan (CRDP) for fiscal year 2021

In early spring 2020, SARC posted a survey on the SARC website designed to gather stakeholder input for the Community Resource Development Plan (CRDP) for fiscal year 2021. The process is driven by funding priorities established by the state and stakeholder input, representing the regional center service area's diversity.

Our past CRDP projects have included Enhanced Behavioral Support Homes for Children and Adults, a Community Crisis Home, Dementia Care Training, and a restraint-free training program for service providers, among other projects.

The outcome of this year's stakeholder survey noted the need for:

- Enhanced Behavioral Support Homes for Adults
- Healthy Relationship training for Adults
- Employment Opportunities
- Increased Supported and Independent Living Service Options

Therefore our CRDP projections will reflect those areas.
