She asked if the committee was not meeting their needs, is there a need to restructure it. It was discussed if they didn’t feel comfortable enough to share and express their ideas. It was suggested that a sub-committee or focus meetings be formed to discuss topics more freely then take them to the Board and regional center.

II. Definitions:

These same terms are used throughout the Lanterman Developmental Disabilities Services Act.

Supported Living Arrangements (SLA) include the provision of opportunities for adults with developmental disabilities, regardless of degree of disability, to live in homes that they own or lease with support available as often and for as long as it is needed, when it is the preferred objective in the individual program plan.

If the exception is granted, the service coordinator amends the person-centered individual program plan, notifies the consumer individual/family, and gives a copy of the amended plan to the consumer individual/family.

If the exception is not granted, the service coordinator promptly informs the consumer/family that it has not been granted, informs the consumer/family of their appeal rights, and sends a notice of action and a fair hearing form.

In March we had 5 care homes under watch for Covid exposures. 2 of the 5 care homes had not been vaccinated at all and were trying to get access to vaccination when infection started. 1 hospitalization resulted from the Virus for a consumer. 2 other homes were fully vaccinated and infection started with staff exposing everyone at the home. No symptoms or mild symptoms were found during Isolation process of staff and consumers.

1 last Home was an ICF that involved a new admission that was placed on quarantine at admission time, After 2 days she had a change of baseline. Both Public Health and the Hospital cleared the person that has having lingering virus shedding post previous infection (just at the limit of the 90 days). She was treated for an infection that was not related to Covid.

In March, SARC also hosted our first 2 vaccination clinics in our newly renovated Watsonville office in partnership with Safeway Pharmacy.

March 14th out of 300 doses available we provided vaccination to 282 persons.
March 15th out of the 300 doses we provided vaccination to 286 persons.

In April SARC decided to not give PPE and focus on the vaccinations hosted at our offices. PPE was available for providers and families who reached out to SOE@sarc.org or directly to their Service Coordinator.
We gave PPE to 4 providers in San Jose and to 7 families.

SAN JOSE:

**Watsonville**

We had the second dose of Pfizer on April 14th gave out 282 doses, and on the 15TH 286 doses.

**C. Highlights:**
The majority of our care home residents and staff are now fully vaccinated.

April brought a very low number of Covid-19 positive cases and we only had 3 care homes that were under watch in Santa Clara County. . Department of Public health followed the home and made the report to CDC with the vaccination information and outcome of the Virus in the homes.

Public Health did testing every 3 days for everyone that was negative. On the first round of tests Public Health tested everyone even the positive cases. The goal was to be able to see the type of variance of Covid the home was infected with. The data is not available to SARC or the home.

From the 3 homes only 2 had previous Covid (all homes had been fully vaccinated) One of them was Positive with Covid at end of December 2020 (the entire home: consumers and staffs were positive) They were all vaccinated in February (2 doses Pfizer) and 1 consumer tested positive back in April (he died on Hospice at the hospital of complications of Covid) no staff or other consumer were tested positive in the home.

Another Home had 3 consumers and 2 employees Positive with no symptoms, no hospitalization. (First case was detected in a Staff) The last home had only 1 employees tested positive, no symptoms and no other people tested Positives in the home.

All of the care homes found- out the positives results, because of the routine surveillance test.
