

Community Resource Development Plan (CRDP) Priorities Fiscal Year 2021/2022

The Community Resource Development Plan (CRDP) process is uniquely designed to capture the future funding priorities of our community by surveying those who receive services, their families, our service providers, and other stakeholders.

In early spring 2021, SARC launched the CRDP survey, which was built to explore services needed for all age groups. This year the survey was designed to look at each service in three ways:

- Is more of this service needed?
- Is better quality service needed for this service?
- Is a service needed that looks different from the existing service?

After analyzing the data from this year's survey, there was one service that was clearly identified as the highest priority:

- More affordable housing

Given the funding released from the state this year, our CRDP funding request will reflect affordable housing as a funding priority.
