

Community Resource Development Plan (CCP/CRDP) Funding Priorities FY 2024/25

Greetings;

The Community Resource Development Plan (CRDP) process is designed to identify our community's future funding priorities by surveying service recipients, their families, service providers, and other stakeholders.

This summer, SARC launched the CRDP survey, which aimed to assess the needs of different age groups and evaluate each service based on three criteria:

- Is more of this service necessary?**
- Is better quality needed?**
- Is a different type of service required?**

From the survey data, we've identified the following as key funding priorities for our community:

- Service Provider for our Enhanced Behavioral Support Home (EBSH) for adults with judicial involvement due to inappropriate social and sexual offenses.**
- Affordable multi-family housing.**
- Behavioral Day Program.**

Given the state funding released this year, our CRDP funding request will align with these identified priorities.
